CINCINNATI, OHIO

FROM BEER'S HISTORY OF CLARK COUNTY OHIO- 1881

In the year 1805 there came from Virginia two brothers, Andrew and Samuel Black, who together selected and later entered Section 25, dividing it between them, the former coming in possession of the southern half. This is the first trace we have of a settlement in what now comprises Pike Township, Clark County, Ohio.

They returned to their Virginia home, where Andrew had left a wife and one child. Samuel was an unmarried man. The following year (1806) after due preparation had been made, Andrew accompanied by his family and brother, again turned his course westward for the chosen spot of their future home. Upon the southern half of Section 25 was erected the first cabin in the township. It was the rude log pole cabin of the day. Soon a space of five acres was deadened and the underbrush cleared, and the first crop of corn planted which was carefully cared for by these first comers, but the squirrels were so numerous that when the gathering season came, but three bushels were gathered.

These men were both natives of Montgomery County, Virginia, Andrew being born March 6, 1783, and dying on the homestead October 18, 1854. He was buried in what is now known as the Black Cemetery.

Samuel Black died in the year 1814 and was interred in the same burial ground. He served as Captain in the War of 1812, where he contracted the fatal disease of consumption, which terminated in his death. Andrew also performed some service as a scout in that war.
